## **Delta Solutions & Technologies Announces Capability Maturity Model Integration (CMMI) Level 3 Rating**

**Reston, VA (March 14, 2008)** – Delta Solutions & Technologies, Inc., a Virginia-based, management and technology consulting firm has announced that it has achieved a Capability Maturity Model Integration (CMMI) Level 3 rating from the Software Engineering Institute (SEI) of Carnegie Mellon University. CMMI is an internationally recognized framework for process improvement. It combines carefully selected best practices based on experience in a variety of disciplines, including systems analysis and design, software engineering and management. The appraisal provides Delta Solutions with an effective advantage in a constantly changing and competitive environment.

The CMMI Level 3 rating was awarded to Delta Solutions following a company-wide collaborative effort of internal, organizational restructuring and process improvement. Preparations included 18 months of standardization, training and assessments. During the appraisal, both the Delta Solutions Project Management Life Cycle (PMLC) and Software Development Life Cycle (SDLC) were rated against industry standards set forth by SEI. Delta Solutions' methodologies and current engagements either met or exceeded these industry standards.

"This rating is a culmination of 18 months of hard work and dedication to process improvement for the entire organization," said Tim Spadafore, Vice President and appraisal sponsor, Delta Solutions. "It will better position Delta Solutions to support the Federal Government and all of our customers more effectively. I strongly believe this will provide us with the resources and ability to compete on a larger scale within our customer base."

The CMMI model helps to integrate separate organizational functions, set process improvement objectives, provide guidance for quality processes and provide a point of reference for evaluation of current processes. Using this approach allows Delta Solutions to improve their support to Federal Government initiatives. Many Federal agencies use the rating as a highly regarded evaluation tool for project management, systems and software engineering contracts.

Delta Solutions' conformance to the multiple process areas prescribed by the CMMI model was appraised using the Standard CMMI Appraisal Method for Process Improvement (SCAMPI) approach. The evaluation was conducted by a team led by an SEI authorized lead appraiser from American Systems.
